Follow the next instructions to learn how to save YouTube videos to PC free with Aiseesoft Free YouTube Downloader.

### 1. Download [Aiseesoft Free YouTube Downloader](http://www.aiseesoft.com) now, install and run it.

### 2. Browse YouTube videos and select by yourself

Visit [www.youtube.com](http://www.youtube.com), browse YouTube videos and select.

### 3. Add a new YouTube video downloading task

Click **Add Task** button on the toolbar to open the Add Task window, and copy the URL of the YouTube video you want, then paste it into the "URL" textbox. Set File Name, Save Path etc for the video downloading task.

**Tips 1:** If you would like to download current YouTube Video you are watching, please right click the mouse at the current video url and choose "Download by YouTube Downloader" from the pop-up menu.

**Tips 2:** You can also download all videos from the current opened page, just right click the mouse at anywhere of the page then choose "Download All by YouTube Downloader" from the pop-up menu, a window will pop up with all urls detected by this program, you can choose some of them to download by selecting the check box or just select all to download the all videos.

#### **4. Start the YouTube video downloading task.**

Use **Start, Pause, Stop** button to control the video downloading task. After finishing the task, you can find your wanted YouTube video in destination folder.
